## THINK:MATERIAL

THINK:Material made its debut at IIDEX/NeoCon Canada 2009 as a new interactive exhibit that showcases innovative materials from across the globe. Curated by International Materials Consultant, Jim Salazar and coordinated by IIDEX Intern, Amy Au, THINK:Material is an experiential, must-see playground of inspiration for the materials enthusiast. Based on contextual need, the architect/designer is presented with an extensive array of options ranging from high-performance to intelligent applications that will stimulate the creative process and play an integral role on the impact of finished projects.

## IIDEX/NEOCON CANADA: A CELEBRATION OF DESIGN

IIDEX/NeoCon Canada is Canada's largest exposition and conference for the design, construction and management of the built environment in all areas of design—workplace, healthcare, retail, hospitality, residential, lighting, architecture and sustainable design. The show attracts 400 exhibitors and 16,000 designers, architects, and facility managers from across Canada and the bordering states, the support of over 25 professional and trade associations and over 30 trade media and on-line publications. In 2009, IIDEX/NeoCon Canada celebrates its 25th anniversary, ARIDO, the show owner celebrates its 75th anniversary, and our newest show partner, the Green Building Festival celebrates their 5th anniversary. A true celebration of design.

Visit the IIDEX/NeoCon Canada website for more information  
[www.iidexneocon.com](http://www.iidexneocon.com)

IIDEX/NEOCON CANADA 2010 HAPPENS SEPTEMBER 23-24, 2010
