

## TECHNOLOGY EXPO

The Technology Expo is the place where design professionals can experience leading technologies from technology leaders. The place where companies showcase their knowledge leadership while demonstrating their latest products in electronics, audio visual, digital signage, automation and communication systems, lighting controls, security and HVAC, systems integration - for the simplest to the most complex environments.

The Technology Expo offers a cost effective and streamlined solution to make contact with over 15,000 architects, interior designer, facility managers, lighting engineers, builders, developers and business specialists from across Canada and the bordering states.

Exhibitors gain face-to-face interaction and increased corporate visibility with key industry contacts.
