

IIDEX/NEOCON CANADA: A Celebration of Sustainable Design

IIDEX
NeoCon Canada

For twenty-five years IIDEX/NeoCon Canada has been an industry leader and a year full of anniversaries is no exception. This year's programming and events celebrate IIDEX/NeoCon's 25th anniversary and the 75th anniversary of ARIDO, owners of IIDEX/NeoCon Canada. Plus their newest show partner, the Green Building Festival, celebrates their fifth anniversary by co-locating with IIDEX this September 23-26th at the Direct Energy Centre in Toronto.

This year's line up includes the Green Building Festival, World Green Building Council's Leaders Summit, core learning and CEU accredited seminars specifically for architects plus a keynote with a twist. For 2009 IIDEX/NeoCon Canada and show partner the Green Building Festival look at the big picture by presenting how urban visionary Enrique Peñalosa transformed Bogota, Colombia through the creation of programs focused on sustainable mobility, resulting in social equity for all citizens.

The World Green Building Council Toronto Leaders' Summit will be the first time the WorldGBC brings together Canadian and

international industry leaders and policy experts to discuss the enormous potential green buildings can provide as nations work to reduce their carbon emissions and discuss the potential for green building development strategies as an integral part of a new low carbon economy.

So get a jump on the latest seminars, workshops, keynotes and tours programmed specifically for architects, developers and real estate executives interested in the design, construction and management of the built environment by using the on-line conference planner and seminar search engine. All IIDEX, Green Building Festival and Light Canada seminars, keynotes and tours are accredited for CEU points for interior designers, architects, and facility managers. Add in a visit to the exposition to keep the learning going with over 300 exhibitors featuring hundreds of new products and services at Canada's largest design exposition and conference.
